Talk title: "Enhancing Canada's High Consequence Pathogen Testing: Balancing Research, Centralization, and Decentralization"

Objectives:

1. Understand the Current Challenges and Limitations of dealing with high consequence pathogens (HCP) in outbreaks and potential imported cases into Canada.
2. Explore Innovative Research Approaches that have been undertaken at PHAC-NML to address these issues.
3. Assess the Impact of Recent Research Findings on the implementation of care for HCP in Canada and the world including potential for changes in Practice and Policy.

Dr. Jim Strong - Head, Diagnostics and Therapeutics – Special Pathogens, PHAC

Assistant Professor, 1) Departments of Pediatrics and Child Health, 2) Medical Microbiology and Infectious Diseases and 3) Pediatric Infectious Diseases, University of Manitoba
